

What other careers can I pursue at SPTS?

SPTS's Newport Head Office is home to all global administrative functions therefore we support careers in (non-technical) professional disciplines such as Finance, IT, Procurement, HR, Sales, Marketing, Operations and Supply Chain.

What do they do?

The professional administrative functions are crucial to the smooth running of the business. The Finance department provides financial management and reporting, the IT department is critical to keeping all departments working and HR is responsible for ensuring the company has the right number of people with the right skills to keep the business running successfully.

Supply Chain are equally important for ensuring that the goods and services the business needs arrive at the right time and at the right price. Marketing help to ensure that our customers know what we make and Sales sell it!

What subjects do I need?

It depends on the role... for Finance an aptitude for numbers is required so maths is an important subject. For IT roles, IT technology and computer sciences are good subjects to study. For other roles the important skills are often attitude and aptitude. If you can demonstrate this in any subject by getting good grades, we can give you the skills and training you need to do the job.

“ Within purchasing at SPTS, no one day is the same. It's a fast paced and challenging environment requiring innovative thinking to solve problems. I love working within an enthusiastic, warm and welcoming team. ”
Amy Buyer

Dan, Finance Assistant, Network75

How did you come to work at SPTS?

I came to work at SPTS through the Network75 scheme at the University of South Wales. During term time I work 3 days a week at SPTS and study for an Accounting and Finance degree 2 days a week; in the holidays I work at SPTS full time. At the end of this scheme I'll have a degree and five years of work experience.

What does your job involve?

My current role, involves assisting cost centre managers with their budgets. When they want to make adjustments or accruals they submit them to me and I'll process them. I also process SPTS's VAT and Intrastat, while also performing many ad hoc jobs as they come. My previous

role involved being part of the customer support finance team, where I worked with service managers to present their figures to directors and other senior members of staff. This mix of exposure has been great in letting me see all sides of the business.

What subjects did you study?

I studied Maths, ICT and Geography at A-Level

What qualifications do you have?

I have a Certificate of Higher Education in Maths from Cardiff University, three A-levels and I'm on track to get a first in my Accounting and Finance degree.
